B. Administration and Problems

FOIAb3b1

Records Management Section-A disposition schedule was prepared for the "housekeeping" records of the [REDACTED] and Form 115, Request for Authority to Dispose of Records, has been forwarded to the National Archives. In accordance with an agreement with the National Archives, [REDACTED] who has been cleared by this Agency, will examine the schedule and will call at this office for review of the samples, if necessary.

25X1A9a

A proposed notice regarding the standardization of filing cabinets to be stocked is in process. The original draft was approved by the Logistics Office, but is presently being held up by the Office of I&S. The Office of I&S objected to the nomenclature used in describing the caged areas in which standardized cabinets can be placed for use in lieu of combination lock cabinets in open areas. The Office of I&S redrafted the notice, but the result was not acceptable from our viewpoint. In a subsequent meeting, the notice was redrafted along the original lines, but to date has not been forwarded to us by the Office of I&S.

25X1A9a A Proposed notice regarding the standardization of filing supplies has also been ~~proposed~~ <sup>prepared</sup> and is now being processed by the Regulations Control Staff. On the basis of this proposed notice and verbal clearance from [REDACTED] the Logistic Office is now attempting to procure the residual stock of such supplies held by Office of Price Stabilization. If successful, the cost of the items will be substantially less than the current schedule price.

Approximately three cabinets of Administration file material have been forwarded from the Mail Control Section to the Records Center. As a part of the training plan for Records Center staff and the less experienced records analysts, this material is now being reclassified and filed in accordance with the system recommended by this office for adaption throughout the Agency. There are twelve persons participating and it is expected that their experience will be very helpful in getting new Records Officers started on the Office Records Management Programs which will be outlined to them in the training program now being developed in collaboration with the Office of Training. The reclassified material is being set up as model files for demonstration purposes.

The Records Management Training program, which is being developed with the Office of Training, is progressing. The Training Office is forwarding letters to outside speakers to confirm informally agreed-upon speaking dates. A tentative schedule and program have been established. Agency speakers are now preparing their talks. It is planned to review the speech material and have rehearsals with the speakers before the program gets under way.

~~CONFIDENTIAL~~  
Security Information

Vital Materials: The Area Records Officers of the Office of Operations and the Office of Procurement were contacted regarding their inactivity in making deposits. In order that this office may establish schedules to determine, what and when, deposits should be made by these offices, they were requested to supply listings, enumerating the various categories of vital materials in their respective offices, or materials of other offices necessary to continued operations of these two offices. The reduction in amount of microfilming was also discussed with these offices and a follow-up will be made.

25X1A9a Last Thursday, at the request of Mr. [REDACTED] Area Records Officer 25X1A9a for DD/P, Mrs. [REDACTED] a records officer for one of the area offices of DD/P, visited the Repository.

The Office of Training has not to this date replied to or made deposits of vital materials listed in our memorandum of 5 Jan. '53.

Two microfilm readers for use in the repository have been received from the Recordak Corp. and will be delivered to [REDACTED] by Wednesday, 8 April 1953.

25X1A6a

Microfilm projects completed in the week ending 1 April 1953:

Office of I&S-

Requested Branch File Number (Investigative cases) 3 reels

Investigative File Index-Reference Section 9 reels

Case Control Cards 1 reel

Pending Case Control Card File 1 reel

Comptroller's Office

Fiscal (Form CSC-2806) Individual Retirement cards 3 reels

Records Center Section-A tally was made for Mr. [REDACTED] use of all 25X1A9a intelligence reports, which were received in the Records Center from sources other than the Printing and Reproduction Division. A four week period ending 28 March, was covered in making the tally. The handling of such intelligence reports involves considerable work and the tally should be helpful in identifying individuals and offices which could be removed from the initial distribution list.

Mail Control Section-Current information indicates that the new mail trucks should be delivered and the mail racks installed within the next week. Three couriers have qualified as truck drivers and two more have been scheduled for tests. A tentative schedule for the new trucks has been prepared and it is planned to place them in operation as soon as possible.

~~CONFIDENTIAL~~  
Security Information

~~CONFIDENTIAL~~  
Security Information

There are now six couriers in addition to two supervisors who are qualified to carry arms. Several more are now qualifying or will attempt to qualify in the next few weeks. This number of men qualified in the use of arms has been made necessary because of the recent requirement that armed couriers stand by in the evening and on weekends for taking classified material to the homes of the Director and Deputy Directors. There were no calls for this service in the past week.

One courier, full time, was required by NSC in the past week.

The three couriers who were cleared by OCI were indoctrinated by OCI personnel on 30 March and two are now on duty in the jobs recently transferred to the Mail Control Section T0.

A system for the weekly accounting for couriers' free time is now being developed. ~~It is indicated that~~ the figures will be included as a part of the regular weekly statistics in the near future. Results for the past two weeks indicate that for the [redacted] couriers, there was 7% and 4% free time in these two periods. Contributing to the lower figure in the second week is the assignment of couriers to the OCI jobs.

C. PROJECT STATUS REPORT

Project 1-53 - Records Management Survey of the Office  
of the Director:

A draft of the completed report has been submitted to the Chief of GS. Additional copies are available for submittal to the DDA upon final approval by the Chief, GS.

Project 2-53 - Installation of the Agency filing system  
and correspondence control system in PS&O.

This project is completed and no further report are be made unless some problem develops and is revealed during the periodic follow-ups that are being made.

Project 3-53 - Preparation of a comprehensive schedule  
for the disposition of fiscal records.

This project is in process and will require approximately two weeks to complete. However, work is temporarily halted as the analyst assigned is now working on the Regulations for the Branch and on a talk to be given in the Records Management Training program now being developed.

Project 4-54 - Record Survey of the Office of Operations  
(Project description sheet to be submitted later)

An inventory of the records of the Index Branch of the Contact Division is about completed. This Branch maintains the largest collection of records in the Division. Work is temporarily halted while the analysts work on Records Management Regulations and a talk for the scheduled Training Program.

E.

WORK IMPROVEMENT PROJECTS

Project 1-53 - Rearrange and properly index distribution material.

Project completed this month.

Project 2-53 - Refile unbound information reports in properly indexed folder.

Project 98% completed. A shortage of folders prevented completion this month.

Project 3-53 - Conversion to the revised card in the Intelligence Report inventory control file.

Project is 95% completed.
